

The Original BUYER Commission  
REBATE Company of Colorado

2009

Greetings.

VaST Architecture designed my personal residence, which was completed in the second half of 2008. VaST was involved from beginning to end, and I am so grateful that they were. I highly recommend VaST for a number of reasons.

First, the VaST team, and Joseph and Brandy, in particular are great people to work with. They sincerely cared about my project, always kept a positive attitude, and were trustworthy, friendly, and customer focused. And as if that were not enough, I found them incredibly accessible.

Second, the approach VaST used has paid us big dividends. We came with some preconceived notions about what we thought we wanted, and VaST respectfully and thoughtfully challenged those notions, ensuring that the house would ultimately meet our needs for daily living. One thing that has stuck with me in particular is something that Joseph told us on more than one occasion: "Don't worry about what the outside is going to look like yet, let's make sure we get the floor plan to work for you first."

Lastly, while VaST is clearly committed to sustainable design and high performing structures—and they delivered one for us, they are also sensible and understand the competing demands and issues that face today's consumer and property owner. In the end, they were able to get us comfortable with some green technologies and processes that I could not imagine living without.

I highly recommend VaST, and wish you the best in your endeavors,
